

ENCLOSURES AND SWITCHGEARS FOR NAVAL INDUSTRY

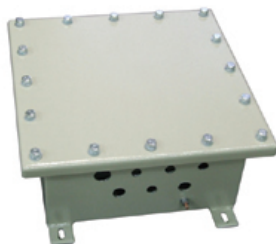

CONTROL PANELS

We would like to offer control panels made according to the documentation fitted to customers' needs. Control panels are made of steel plates and covered with powder coating. Their main destination is exploitation on vessels – as control panels on the bridge and in the engine room.

ENCLOSURES AND SWITCHGEARS

We offer enclosures and complete switchgear equipped according to customers' needs. Enclosures are made of steel plates covered with powder coating. Depending on requirements they can also be made of stainless steel. There is a possibility to fit the enclosure to any designed application, like for example: navigation board, synoptic board etc.

SWITCHGEAR SERVICE SYSTEM AND EQUIPMENT

We offer selection of components from the range of switchgear devices, control systems and regulation of: temperature, humidity, heating systems, ventilation systems, lightning for enclosures and visual safety signaling devices, uninterruptible power supply.

FURNITURE FOR SHIP ACCOMODATION

We present a range of furniture for ships, made of aluminum plates, covered with powder coating in a wide color range of RAL palette. There is a possibility to make customized projects according to customers' requirements.
